# Spectacular savings on heating bills for Classic Country Manor Hotel

**Albright Hussey Manor Hotel, Shrewsbury**

**Biomass solution:** 199kW Woodco E-Compact Boiler c/w 8 tonne Fuel Store

**Installer:** B&C Heating, Leek, Staffordshire

**Installation:** December 2013

Mr. Paul Subbiani, was spending £20,000 p.a. on oil to heat the hotel's 26 beautifully appointed suites, leisure centre and spa, restaurant and dining area, and conference and function suites

**The Albright Hussey Manor Hotel of Shrewsbury, Shropshire, dates back to 1524, and is heated with a Woodco E-Compact Biomass Boiler.**

The hotel is a Grade 2 Listed classic country house, and one of only two 4-Star AA hotels in the area. The managing director and proprietor,

## A Biomass Solution

Following months of intensive research on Biomass Boiler systems, decided to install a 199kW Woodco E-Compact Biomass Boiler. Since switching to wood pellets the owner saves approximately £10,000 on fuel costs. On top of that, the Government Renewable Heat Incentive (RHI) scheme will pay the owner approximately £22,000 p.a., so the savings are quite spectacular for this family owned hotel. The E-Compact 199kW Boiler provides all the hot water and heating needs of the hotel. Space only allowed for an 8 tonne fuel store, so the hotel receives 8-9 pellet deliveries p.a. Mr. Subbiani arranged to have a purpose-built plant room constructed adjacent to the hotel and had the exterior cladded with wood, in keeping with the Tudor design of the hotel.

Dear Gerard

I would just like to write and commend your wonderful product and excellent service. I had been considering a Biomass Boiler for my hotel for about eighteen months when I came across your 199kW E-Compact Boiler. What impressed me initially was the compact size, as I had limited space in which to install a boiler. I had researched many Austrian, German and Italian boilers, all of which were bigger, more complex and more expensive (with some not meeting the new emission laws!). Before I made my decision I called you directly and you answered all my queries. I then decided to visit your facilities in Southern Ireland to see the boiler first hand. Once I saw your facilities and parts back-up, I knew that your boiler was for me and your personal service led me with confidence.

The boiler has now been installed for eight weeks and I am very happy with its performance and your excellent back-up service. I definitely made the right purchase.

I can now have a very warm hotel with endless hot water without the fear of huge oil bills and I am now looking forward to my first RHI payment.

I have no hesitation in recommending your products and services.

Best wishes

Paul Subbiani,  
Managing Director
